1. Our Organisation

Overview

ENTERPRISE MANAGEMENT SYSTEM is an IT Consulting and Staffing firm, supporting clients across sectors in software consulting and staffing for their varied business demands. Helping organizations to streamline their business needs, reducing hiring time & costs for a hassle free, well trained, ready to be deployed resource.

We are in the business of building large Human force, trained and focussed to build large and successful organization. We solve Human resources challenges, from identifying to hiring to training to on field deployment.

When it comes to optimizing productivity and workforce planning, most businesses can use an additional set of hands to undertake larger projects or complete those in progress. However, many companies have difficulty finding individuals who have relevant experience.

As we move to be a skills-based economy, as resources are to be technology trained to be hired, we fill the gap of resources being industry ready. A diverse market environment, that needs technology aware resources, takes that extra investment preparing the environment for sustained learning.

Leadership

Organization is driven by team of experienced IT professionals, to power us on to an inclusive future, where we seek to transform the world, being the bridge between the aspirations and reality.

Our Leadership is thought provoking, asking "What If", putting the right questions, sharing ideas in a free innovative environment to ideas to blossom. Our Innovative leadership team always open to explore new solutions in the existing environment. Everybody is heard and motivated to explore out of the box.

Our Roots

ENTERPRISE MANAGEMENT SYSTEM, are the subject matter experts in IT Consulting and Global Resourcing. Catering to clients Globally supporting on technology advisory services and Technology staffing across multiple sectors. A matured enterprise in US, being registered across 30+ states with hundreds of highly skilled associates

Our Promise

Speed – with agile team in action across regions, with clear tasks identified to fulfil for each role, a factory in action resulting in considerable reduced time gap for the Service Delivery is always.

Scale – With a ready team of recruiters in action, working in global cultures have built capability to build teams from scratch for short & long-time project deployments.

Wide technology Spectrum – Technology is like weather, ever changing, so are our training programs. We have a well-equipped training faculty across technologies to prepare recruits and IT engineers to get deployed in various organizations and also to build products across technology spectrums

Innovation in our DNA - We take pride to claim that we are Innovation focused organization. We invest considerable time and energy, always looking out for ways to improve and improvise on our existing processes on recruitment, training and projects delivery. Assuring our clients uninterrupted supply of well-trained quality resources for their complex requirements and capability to deliver projects beyond boundaries.

2. Our Competencies

IT Staffing

Identify

We evaluate the potential resource on all the parameters that an industry would rely-on to validate.

Education background to Certifications, Working experience to working across cultures, ability to learn and unlearn, flexible to fit into teams across projects and geographies.

Onboard

We have a proven Factory model in-place with a human face, to validate profiles for human values, technical skills, open to get trained and to be a team player

Upskill

We have in-house training staff along with Training partners to fill the individual skills to the industry demands. As part deploying any resource to client, we have a proven induction program to navigate the resource through the client expectations, their culture and acceptable behaviour

Deploy to deliver

We have best fit resource ready to be productive from day one. We train and groom the resource to the client's requirements, as we understand the client expectations inside out. We have specialized soft-skills induction to have the resource ready to fit into any heterogeneous working cultures and work demands.

IT Consulting

The Information Technology is having a huge operational impact across business sectors and domains. IT functions play a pivotal role in the way businesses operate, enabling organisations to be nimble across functions, paving the way for organizations to inculcate innovative practices.

IT Enabled industries, are more efficient in streamlining processes across functions in reducing operational costs, efficient communication across organisation, improved performance, effective competitor analysis, early to market with products and services resulting in sustained business success.

Responsiveness and the ability to adapt to ever-changing environment settings of the IT market are crucial when you are designing an IT strategy geared for digital transformation. These two elements benefit greatly from standardized lifecycle support of IT solutions that provide a systematic framework for every IT project. Here, we describe the stages of the lifecycle support of IT solutions.

Open the Dialog

As part of the capability exchange, we share our offerings that would offer value to our client / partner businesses. We show case with real time scenarios, case studies in similar environments, partners to compliment, most optimal engagement models and more

Engage to understand

Engage the right team, plan workshops with all the key stake holders, understand the environment from the transformation point of view. Get a feel of the AS IS environment, IT readiness, gaps and challenges. Draw out plans, that are mutually agreed and deliverables at each of the engagement.

Deploy to last

Have the dedicated team in-place, get going with the agreed plan that is phase wise, modular, agile and realistic. Have mutual acceptance across all phases of the deliverables, complemented with the needed documentation. Train the Trainer calendar in-place, plan for the transition to

trained teams, plans in-place for year-on-year cost reduction for a sustained environment over a long period of time.

3. Why we succeed

Eco system meant for success

Every activity in our processes, are oriented to create value to our customers, whom we sell our trust, built over our delevrages over time, deliverables shouldered by our subject matter expertise, who have their muscle over years of successful deliveries across geographies. We have Centre's of Excellence, where subject matter experts orchestrate in simulating solutions, calling on clients to foresee solutions and partnering to succeed.

Unrelenting Team

Enterprise Management System is built by a pack of innovative minds, who believe they bring out their best, when they are challenged with the tasks that have not seen the light before, when they are provoked to be agitated to deliver the best and when their dedication is tested for workability. Team that is focussed on Clients and their relationships as paramount, strive to foresee a solution that ensures Client's success.
